Dear Willard and additional person this may concern,
As the instructor of BIPN I approve your enrollment. The courses you've taken give you more than enough background in math, programming and physics to succeed in this course.
I'm glad you enjoyed the lecture so far and I hope you will continue to attend and be an active participant.
To give you access to course materials until your enrollment is confirmed, I've added you to the course on Canvas as an observer.
Please fill out the questionnaire so that we can assign you into a group for the homework.

Regards,
Yonatan Aljadeff
